Questions and Answers #1 - January 22, 2019

1. Do you have a full Cisco validated configuration you can share with us in excel for each of the switch types you are looking for? In the RFP it says “The Vendor shall provide network equipment, modules, components, and applicable licenses as outlined in Attachment B, LAN Equipment Upgrade Specifications per School.” Attachment B only specifies the C9300-24UX-A or equivalent & C9300-48UXM-A or equivalent. There are a lot of different options for modules, components and licenses for each of these builds and we want to ensure we are bidding exactly what the district is looking for.

District Response:
Refer to Attachment C, which has been updated per Addendum #3

2. In Attachment C cell D6 you include 60 under the title of the cell Service Duration. Can you please clarify what you are looking for here? Does this mean you would like us to price out Smartnet for 5 years? If so, can you please confirm the Cisco part number for this?

District Response:
Refer to Attachment C, which has been updated per Addendum #3

3. For Attachment C, cell D5 is left blank. Does that mean you are not looking for any Service Duration for C9300-24UX-A or equivalent? If you are looking forward a Service Duration if you for C9300-24UX-A or equivalent if you can please confirm what Cisco part number you would like us to price out and for what duration.

District Response:
Refer to Attachment C, which has been updated per Addendum #3
