

SAN FRANCISCO ExCEL

FACT SHEET

Urban schools and communities face the complex challenge of providing a high-quality academic education, while helping students meet other developmental needs through programs that are not part of the school's core instructional activities.

Historical Background: San Francisco ExCEL (Expanded Collaboratives for Excellence in Learning) was developed by School Health Programs Department in 2001 to promote alignment and coordination of all Expanded Learning programs. San Francisco ExCEL is the umbrella for the state After School Learning and Safe Neighborhoods Partnerships Program (SB 1756), state Foster Youth Services Program, state Gang Risk Intervention Program, state Healthy Start Initiative, local San Francisco Together Education Accomplishes More (SF TEAM) Initiative, and federal 21st Century Community Learning Centers Initiative.

What is San Francisco ExCEL? San Francisco ExCEL is responsible for supporting school -community partnerships that plan and implement Expanded Learning programs for students and families. San Francisco ExCEL defines "Expanded Learning" to include programs that are not restricted by time, and which are not part of the school's core instructional activities. Examples include before and after school activities, case management services, or special support programs offered during the school day.

Current Status: The program is currently in 51 elementary, 16 middle, and 5 high schools.

Elementary Schools

Alamo	Argonne	Bessie Carmichael/FEC
Bret Harte	Bryant	Cabrillo
