Hi. I am Ling. I am 8. I am in 2 grade. My light is on a round table. My room is nice. I want to go. I like to play video games. My very favorite book is Fluffy. It is about a dog that helped a man. The man was under a table and couldn't get out. Fluffy got the man out and then took Fluffy home. They became really good friends. I really liked it because it is about friends.

Where do you keep your favorite book? Do you like math? I read a book on (about) a dog. The dog helped a man. I went to the movies with my friend. We were seeing (watching) the movie. A man was under a table and couldn't get out. Fluffy got the man out and then took Fluffy home. They became really good friends. I really liked it because it is about friends.

There is a light on top of the table. My room is small and has green walls. I have a bed with covers with flowers. There is a round table next to my bed. There is a light on top of the table. My room is smaller than my mom's room, but it is nice.

How do you go to the library? Go to the library, check out the book, then take it to Mrs. Jones. It is a true story. The table would have been too big for Fluffy to fit, especially since Fluffy is a small dog.

What kind of information should we write down? Does anybody know if there's a switch to turn this ipod off? We observed a caterpillar changing into a butterfly. A butterfly laid an egg on a leaf, and then the egg hatched. The larva grew into a long caterpillar. It built a chrysalis. What kind of information should we write down? Does anybody know if there's a switch to turn this ipod off?

What kind of information should we write down? Does anybody know if there's a switch to turn this ipod off?
